### TOTAL FERTILIZER CONSUMPTION UP 2 PERCENT

Fertilizer consumption in the U.S. and Puerto Rico during the year ended June 30 1980 is placed at 52.6 million tons, up 2 percent from the 51.5 million tons consumed during the 1978-79 year.

Primary nutrient content (nitrogen, N; phosphate,  $P_2O_5$ ; and potash  $K_2O$ ) was 23.0 million tons, up 2 percent from a year earlier. Nitrogen consumption increased 6 percent to 11.4 million tons; phosphate usage decreased 4 percent to 5.4 million tons; and potash at 6.2 million tons was down 1 percent.

The five leading States in order of total consumption and the change in consumption from last year were: Illinois, up 7 percent; California, up 11 percent; Iowa, down 1 percent; Texas, up 7 percent and Indiana, down 3 percent.

Fertilizer consumption represents all commercial fertilizer tonnage sold or shipped for farm and non-farm use as fertilizer. Materials used in the manufacture of registered mixes or for use in other fertilizers are excluded.

### DIRECT APPLICATION MATERIALS INCREASED 6 PERCENT

Usage of all direct application materials increased 6 percent during the 1979-80 fertilizer year to 29.4 million tons. Primary nutrient material (N,  $P_2O_5$ ,  $K_2O$ ) accounted for 27.1 million tons compared with 25.6 million tons a year earlier. Secondary and micronutrient materials increased from 2.1 million tons in 1979 to 2.3 million tons in 1980.

### MICRONUTRIENTS SOLD FOR FERTILIZER

Sales of selected micronutrient elements for use in fertilizer were obtained from known producers. The tonnage shown in table 19 indicates increased tonnage for copper, iron and molybdenum and decreases for manganese and zinc.

#### DATA SOURCES AND RELEASE DATES

This report, compiled by the Crop Reporting Board of the Economics and Statistics Service, is based on fertilizer tonnage reports prepared by State Fertilizer Control Officials and the voluntary response of more than 1,500 fertilizer manufacturers, blenders and sales outlets. The State fertilizer tonnage report for Louisiana was not available in time for this release, therefore, the previous year's consumption data was used for Louisiana.

Current year consumption data will be subject to revision one year from the publication of this report. The consumption by class Report will be released by the Crop Reporting Board on December 5, 1980 at 3 p.m.
